

ANDERSON ENGINEERING, INC.

HISTORY

ANDERSON ENGINEERING, INC. was founded in 1954 and is a comprehensive consulting organization offering civil engineering, land surveying, materials testing and drilling services through its professional staff of 60 employees. The firm is licensed to provide engineering services in eighteen (18) states and surveying services in four (4) states. The firm's main office is in Springfield, Missouri. Other locations include a full service office in Joplin, Missouri, and construction materials lab offices in Crocker, Missouri and Bentonville, Arkansas.

The Company was formed on August 16, 1954 as **Tri-Lakes Concrete Company**. One of the purposes of the original corporation was to perform engineering and architectural work in the design, construction, improvement, extension, maintenance and repair of buildings, structures and improvements. On November 19, 1958, the name of the firm was changed to **Wright-Weeks, Inc.** which was named for the principal engineers, H. Garrett Wright and Gaylord D. Weeks. On April 22, 1966 the firm name was changed to **Wright and Associates, Inc.** In 1969 James S. Anderson became president of the firm. On August 22, 1977, the name of the firm was changed to **Anderson Engineering, Inc.** On June 19, 1998, the Anderson Engineering, Inc., Employee Stock Ownership Plan (ESOP) became the majority stockholder with the purchase of the Anderson family stock. In December 2000, the ESOP purchased the remaining shares of the Company from Steven L. Brady, W. Bruce Rhodes and Joyce Rhodes.

The firm provides civil engineering and surveying services including planning, civil/site design, Phase I environmental site assessments, municipal street and sewer design, storm water drainage and detention analysis and design, boundary/topographic surveys, cadastral, ALTA, GPS and control surveys, drilling services (including geotechnical investigations and environmental sampling and monitoring well installation), construction materials testing with field construction monitoring technicians.

These services are provided for architects, engineers, contractors, private developers, institutions, local, state and federal government and include the design of municipal facilities and infrastructure, commercial developments, various buildings, airports, roads, intersections, signalization, highways, railroads, stormwater detention analysis and design, pump stations, wastewater treatment systems, industrial park developments and residential subdivisions.

SERVICES PROVIDED INCLUDE:

CIVIL ENGINEERING

Municipal Engineering
Commercial/Industrial Site Development
Subdivision Layout and Design
Land Planning
Sewer, Water, Street and Drainage Design
Traffic Engineering

MATERIALS TESTING

Concrete and Masonry
Soil and Rock
Aggregate
Asphaltic Concrete
Structural Steel and Welds
Construction Observation

SURVEYING

Boundary Surveys
Site, Topographic and Utility Surveys
ALTA/ACSM Title Surveys
Subdivisions
GPS Surveys
Construction Staking

GEOTECHNICAL ENGINEERING & DRILLING SERVICES

Explorations, Studies and Surveys
Foundation Analysis and Design
In-Situ Testing
Exploratory Drilling
Monitoring Wells and Piezometers
Laboratory Testing and Analysis
